

recycling & waste
management services

IMPROVE QUALITY • **INCREASE VALUE** • **SHARE REVENUE**

At Eurokey Recycling Ltd we want to work with you to **IMPROVE THE QUALITY** of your material for recycling. We can help you do this by giving practical advice on segregation and collection. We can install balers, stillages and bulkbags to improve your materials handling and increase the weight on the vehicle.

Our own transport infrastructure and central geographical location ensures that we remain competitive. All this means that together we can **INCREASE THE VALUE** of the material. With a bit of effort on your part and using our logistics and reprocessing infrastructure if we work together we can **SHARE THE REVENUE** and increase your recycling rates.

Please contact us for further information.

HANDY HINT

If you want to get the best value for your material, separate the different types (paper, plastic, metals) and, if you have the resource, separate the different types or plastics or at least separate colour from clear. Keep all materials as dry and clean as possible. Increasing the weight of the load significantly adds value. Do this by baling, crushing or waiting till you have a full load of the material.

CLOSED LOOP SYSTEM

The material we collect from you is taken to one of our reprocessing plants in Leicester. From there it will be stored, graded, reprocessed, baled, shredded if applicable, and then sent to one of the factories we have built a working relationship with over the past ten years.

It is then turned into finished product, bin bags, sacks, sheets etc which we supply to a wide range of our customers. This helps us maintain a market for our recycled product at both home and abroad.

How else can we help you?

We also recycle cardboard, paper, aluminium and steel. We can organise a regular collection programme with your self. We can carry out a Waste Audit of your company and can offer a fully registered Compliance Scheme or purchase PRNs on your behalf.
